With respect to the amendment submitted September 11, 2000, it is noted that not all of the amendments were entered as the amendments do not correspond to the claims of record. Specifically, the amendments to claims 4, 6, 7, 11-13, 21, 22, and 27 were not entered and it is also noted that the application contains 19 claims.

Claims 6-10, 15-18 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claims 5 and 13 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 19 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A "use" is non-statutory subject matter.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1761

Claims 1-5 and 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kahn et al.

Kahn et al teach an apple filling comprising water, dextrose-fructose syrup (sweetening agent), starch (thickening agent), potassium sorbate (preservative agent), ascorbic acid (antioxidant agent), and citric acid solution (acidifying agent), see entire patent, especially Example 3.

All of the claim limitations have been considered. None of them are seen as serving as basis for patentability. No claim is allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
